

Welcome to Oshkosh, Wi. Airshow update.

1. This file is my first attempt to share some things completed to enhance FSX scenery. It is designed to show, with files that are available at the time, what Oshkosh might look like with more scenery. There are no people at present because there are problems with current libraries and the displaying of either textures or the mdl's for them. As they become available I will attempt to put pps in the scenery. That will be a job in it self.
2. Installation: You will notice that there two are files including the one you are reading. Place the file titled: "KOSH_KH_Airshow_update in your addon scenery\scenery folder and the go to scenery library in FSX \World\Scenery Library. Choose add scenery and select the folder so the name of the folder appears in the box at top. Click OK at the bottom. FS will update the scenery files to include the new scenery.
Note: If you prefer you may move the textures in the texture folder to the addon scenery\texture folder as they are files that will be used in later projects that will be forth coming. I do not know if this scenery will work in other versions of FS. You at your own risk.
3. I am not responsible for any problems these files may cause you or your computer. If anyone has a problem with the scenery, please feel free to contact me and I will attempt to aid in a solution.
4. This scenery was made with the idea of promoting FS-MP an pilot\ATC website. It was originally designed for one of the many events, such as Red Bull Air Races held all over the globe, we have in the FS-MP community. It is a place to fly where it is real as we can make it. Come join in the fun, and see what else is offered. I know it will be an experience you'll never forget. www.fsmp.com
